

Intercompany Governance Policy

Document IC-GOV-12 · 12 legal entities · USD reporting (no FX in v1)

1. Directional matching

Entity A's receivable from Entity B may only match Entity B's payable to Entity A. Do not net opposite corridors in the same matcher node ($A \rightarrow B$ is distinct from $B \rightarrow A$).

2. Entity master (normalize local ERP names)

US-HOLD Helios Holdings Inc | US-MFG Helios Manufacturing USA | DE-NEX Nexus Germany GmbH (alias DE-Nexus Corp) | UK-LTD Helios UK Ltd | FR-SAS Helios France SAS | NL-BV Helios Netherlands BV | SG-PTE Helios Singapore Pte Ltd | IN-PVT Helios India Pvt Ltd | CN-WFOE Helios China Co Ltd | MX-SA Helios Mexico SA de CV | BR-LTDA Helios Brasil Ltda | AU-PTY Helios Australia Pty Ltd.

3. In-transit window

Allow a **5 calendar-day** in-transit window near month-end. Example: US-HOLD books IC-2490 on 31 January; DE-NEX books 3 February. Tag as In-Transit Timing Break, not a hard mismatch.

4. Netting and materiality

When several invoices are settled with one payment, chain an allocation (M:N) matcher after the directional match. Example: NL-BV invoices NT-01 / NT-02 / NT-03 versus FR-SAS payment IC-NET-MAY-AP (USD 100,000).

Net AR minus AP by entity pair. Highlight material net breaks over **USD 1,000**. Known dispute: IC-2491 SG-PTE AR USD 1,850,000 versus US-MFG AP USD 1,835,000 (USD 15,000 freight).

5. Deliverables

Treasury multi-tab Excel matrix and an executive PDF briefing for the Corporate Controller.
